Projects

All available at my website or GitHub

C	🔖 **Denial of Service simulator**, A networking project consisting of a multi threaded server and client pair. The client overloads the server with requests and logs the time to complete each request to show the effects and trends of DOS and DDOS attacks.
Java	🔖 **Password Generator**, generate a password of any size with a selection of using numbers, letters, or symbols.
SQL	🔖 **University database**, a mock university database with a back end in SQL and a front end user interface made with the Java swing library.
HTML	🔖 **Websites**, I created rhettsmithgall.com which is a personal website with all the information about me! I also created d2policeofficers.com, a website for an online community.

| Coding | 🔖 Java, C, C++, LaTeX, MySQL, JavaScript, HTML, CSS |
| certifications | 🔖 Adobe Photoshop (CS5,CS4), Premiere Pro (CS5), Flash |

Employment History

2019 – 2022	🔖 **LabCorp** Senior Service Rep
	I was a courier responsible for picking up and transporting medical samples from doctors offices and hospitals across the southeast US. As a senior service rep I was responsible for training and managing junior service reps.
2016 – 2022	🔖 **Compute this!** Manager
	Here I was a computer repairman for a small local business. Checking in computers, consulting, register, closing, opening, and training were part of my responsibilities.
2017 – 2021	🔖 **Domino's Pizza** Manager
	Delivery driver and manager. Responsibilities included training new hire, making food, taking orders, and closing/opening the store.
2018 – 2019	🔖 **United Parcel Service** Unloader
	I was responsible for unloading packages up to 150lbs from trailers at UPS
